Education

BE in Computer Science Engg(Data Science)
University of Mumbai

August 2024 - 2028(Expected)
GPA:8.38/10

Technical Skills

Java, C++, C, Python, React, Node, JavaScript, TypeScript, SQL, HTML, CSS, PHP, GitHub and Tailwind CSS

Projects

GSoC & Open-Source Matchmaker Agent (Coral MCP · Gemini 2.5 Flash · Groq Llama-3.3-70b · LeetCode GraphQL API · GitHub REST API · Next.js · Node.js · Docker)

- Built an intelligent agent for Open Source aspirants that maps a user's LeetCode solved-problem tags (Graphs, DP, Trees, etc.) to active GitHub issues via federated cross-source SQL JOINS using the Coral MCP engine running inside Docker, bridging competitive programming skills with real open-source contribution opportunities.
- Project URL: <https://open-source-matchmaker-seven.vercel.app/>

Rescue-Link, Disaster Response Coordination Platform (AWS Lambda, Step Functions, DynamoDB, Cognito, IoT Core, TypeScript, Zod, Express, React, Monorepo)

- Engineered an offline-first PWA for emergency distress signaling, utilizing Service Workers and IndexedDB to ensure zero data loss during total network blackouts, automatically syncing queued submissions upon network reconnection.
- Integrated Amazon Bedrock (Claude 3 Haiku) to automate disaster severity categorization and tactical action planning, capping token budgets at 300 tokens and implementing a sub-5ms deterministic heuristic fallback engine to prevent API throttling.
- Supported incident updates through event streaming with a 15-second polling fallback.
- Built a high-density first-responder situational awareness HUD in Next.js featuring real-time SSE telemetry, background audio alerts, and automated multi-channel emergency dispatch.
- Project URL: <https://rescuer.d3uwi22i8lbov.amplifyapp.com/>

Vidyavardhini Law College website (HTML, CSS, JavaScript, PHP, MySQL)

- Dynamic Academic Notice Board: Handling high-volume PDF downloads (merit lists, CAP schedules) without blocking PHP worker threads.
- Student Grievance & Contact Pipelines: Validating and storing structured form entries in MySQL with anti-spam / input sanitization.
- 3,000+ to 6,000+ unique visitors during critical admission windows.
- Project URL: <https://vlc.ac.in/>

Hackathons and Achievements

- Solo winner in the Coral SQL Hackathon conducted by WeMakeDevs.
- DevFolio's MumHacks Hackathon: Qualified for level 2 from 21k participants.
